

A-LINE-IT by IN-LINE-INDUSTRIES

THE BEST ALIGNMENT AND DIAGNOSTIC SYSTEM IN THE INDUSTRY

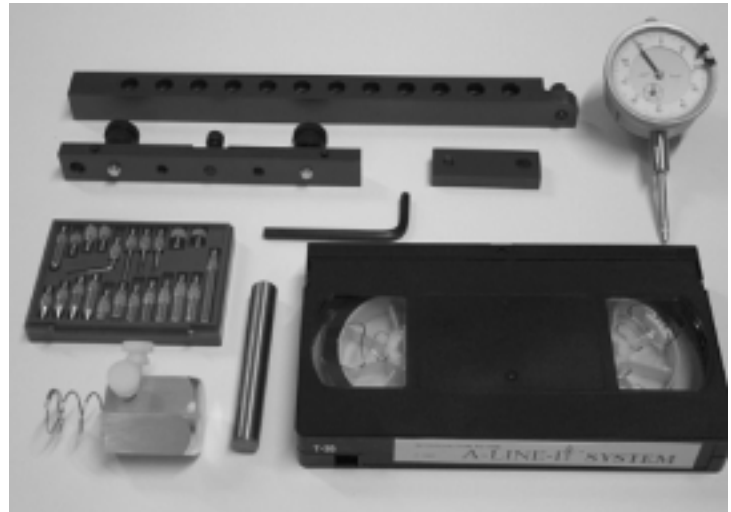

If you only own a table saw, or have a shop full of equipment, the A-LINE-IT is a system you should own. With the ability to see differences of less than .001" (one thousandth of an inch) you will be able to set up your machines quickly, with a degree of accuracy that will have you impressed with yourself! Our patented "Smart bar" automatically adjusts for different sizes of miter slots, and some of the accessories with our system allow you to make tests that no other alignment systems can.

The A-LINE-IT components are packaged in a die cut soft foam package to protect them from damage. The tip set comes in a plastic case to help keep the tips organized. The Mounting bar, "Smart" bar and Planer bar are all machined aluminum and are anodized with an attractive red finish. We even got compliments in the Dec 95 issue of WOOD Magazine when they said "The machined-ground components fit together perfectly" and the finish on the bars "appeared flawless". That's pretty hard to beat!

Included with the A-LINE-IT:

- Indicator Mounting Bar, 11" with 12 preset "Smart" bar locating holes
- "Smart" bar for use in miter slots (self adjusting width, manual depth)
- Planer Bar
- Dial Indicator, 1" range, .001" scale divisions, with revolution counter
- 22 piece tip set
- Spring/Nut assembly (Runout tester on Saw blades and Saw arbor flange)
- 1/2" Runout pin Drill Press/Router)
- Instruction Manual
- 33 minute instructional video
- 90 Day Money Back Guarantee

Machines that aren't properly aligned are not only frustrating to use, but also more dangerous to operate. If you want better performance and a safer machine, don't just adjust it.....A-LINE-IT!

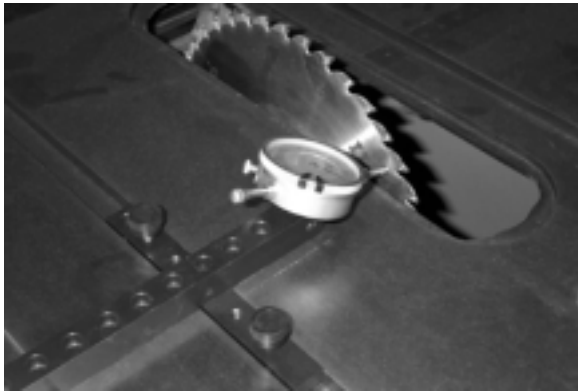

Wood Magazine Dec 95 Products that Perform "the A-Line-It is < deadly accurate and gives you more ways to measure accuracy at less cost than any tool on the market." It got 5 Star ratings for Performance & Value.

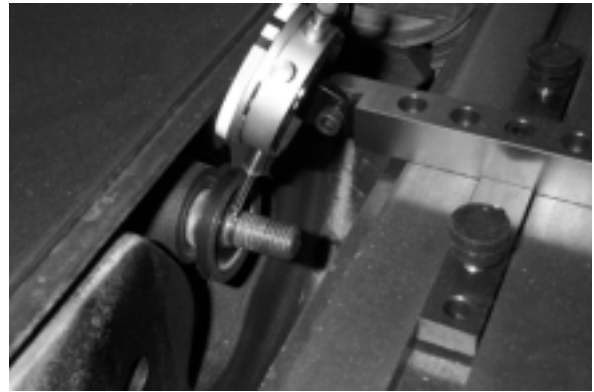

WOOD Magazine Oct 96 "For greater precision, consider investing in a dial indicator, such as the A-Line-It." It was featured on jointers and table saws. It is shown being used on jointer knives in the articles feature photo.

Shown below are a few (but not all) of the applications in which the A-LINE-IT can be used. We are so confident that you will find it so accurate, versatile, and easy-to-use that we give you a 90 Day Money-Back Guarantee on the A-LINE-IT. The 33 minute video that comes with the kit will show you how easy it is to do these tests on your own machines quickly and accurately.

Check Table Saw Alignment

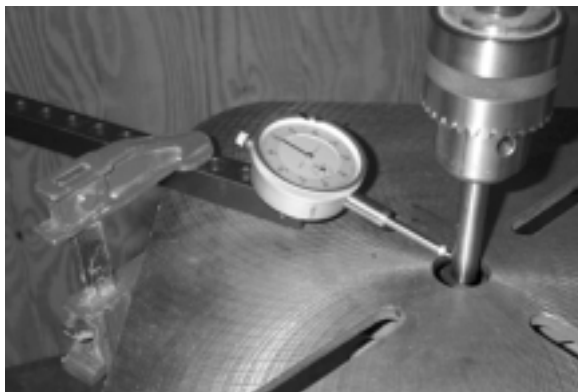

Check Arbor Runout and Bearing Play

Check Jointer Knife Positioning

Check Jointer Depth of Cut

Check Drill Chuck Runout

Check Drill Table Squaring
